EDUCATION

University of Agriculture
Bachelor of Information Technology with a major in Computer Science

Fasilabad
Sep 2023 - May 2027

EXPERIENCE

Full Stack Developer – Web Applications & APIs — Remote **May 2024 – Sep**
Devniti **Fasilabad**

- Engineered scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) with a focus on clean architecture and RESTful API integration.
- Developed real-time features with Socket.IO for live updates and notifications, improving system responsiveness and collaboration.
- Designed and implemented dynamic dashboards and admin panels using Next.js, Tailwind CSS, and TypeScript, improving data visualization and workflow efficiency by 40%.

PROJECTS

EventSnap | Next.js, Node.js, Express.js, MongoDB, Socket.io **Oct 2025 – Present**

- Developed a real-time event-sharing platform where authenticated users can create or join live memory-sharing rooms events and share photos instantly also users can chat.
- Enabled instant photo sharing and updates across all connected clients using Socket.io, ensuring seamless synchronization without page refreshes
- Implemented a live control panel for event creators to view user activity — showing who joined or left in real-time with toast notifications

Blogify | React.js, Node.js, Express.js, MongoDB, Cloudinary, OpenAI API **Aug – Oct 2025**

- Built a full-stack blog platform featuring two user roles — Admin and User — with role-based access to content management
- Integrated AI-powered description generation that automatically summarizes articles based on their titles using OpenAI API
- Designed an Admin Dashboard to post, delete, and approve user comments for enhanced moderation control

Inventory Management System | Next.js, Node.js, TypeScript, Prisma, NeonDB, Tailwind CSS **June 2025 – Aug**

- Designed and developed a complete inventory management system handling product CRUD operations, analytics, and low-stock alerts
- Integrated NeonDB (PostgreSQL) with Prisma ORM for scalable and efficient database interaction
- Focused on core business logic, backend reliability, and API structure, achieving smooth real-time dashboard updates

ClipChat | React.js (Vite), Node.js, Express.js, MongoDB, Clerk, Redux Toolkit, ImageKit **Feb 2025 – July**

- Created a social media app inspired by Instagram for sharing short video clips and images with real-time engagement features
- Implemented Redux Toolkit for optimized state management also Integrated Clerk authentication, ImageKit for uploads.
- Enabled following/unfollowing users; home feed displays posts from followed users.

Chatty | React.js, Node.js, Express.js, MongoDB, Socket.io **Nov 2024 – Jan**

- Developed a real-time chat app with user authentication and live online status.
- Added profile customization and profile picture updates

Imagify | Node.js, Express.js, MongoDB, JWT, Axios **Jan 2024 – Feb**

- Built a text-to-image AI generator with JWT authentication and a credit-based limit system.
- Allowed 5 free generations per user before requiring a paid plan.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL (Postgres), JavaScript, Typescript, HTML/CSS
Frameworks: React js, Next js, Node.js, Express js, FastAPI, Material-UI,
Dev Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio
Libraries: Chart js, Moment.js, Three.js, Pandas, NumPy, Matplotlib
